# Accessories

## Crimping dies for a 4mm standard connector

Made from tool steel and with center slot to enhance crimp

R750.00

Standard cable tensioner once crimped

## 10 Ton jack and steel frame

Method

Step 1:

Place the dies one on the other in the centre of the jack.

Step 2:

Place a 4mm standard connector into the dies

Step 3:

Put the cable into the connector

Step 4:

Pump up the jack and crimp the connector

Caution: once the jack is stiff the connector is crimped!

Do not over jack you could break the dies!

## Hand held hydraulic crimping machine

This machine is very easy to use.

Light in weight and easy method.

Comes with a range of dies that interchange quickly for a range of connectors and cable sizes

| R 1 660.00

## Hand held cable cutter

These cutters can cut up to 8mm stainless steel wire rope.

Light in weight easy to store and not electricity need.

Very neat cut with no heat transfer.

Cables can be cut using baby angle grinder and a slim line disc  
this method requires electricity and transfers heat.

| **R1050.00**

## stainless steel wire rope(316\*)

diameter	construction	min breaking load(KN)
1.5mm	1x19	2.1
3mm	1x19	8.4
